1. About This Manual

This **Administrator Manual** covers company setup, user management, permissions, settings, backup, year-end closing, and system maintenance. For daily sales/purchase entry and books, refer to the **Operator Manual**.

1.1 Administrator Responsibilities

- Create and configure companies (max 3 per installation)
- Manage users, roles, and module permissions
- Configure invoice numbering, print, and barcode settings
- Set up automatic backups and perform restores
- Run year-end closing and database maintenance
- Monitor audit logs and system diagnostics

2. System Requirements & Installation

2.1 Minimum System Requirements

- Operating System: Windows 10 or Windows 11 (64-bit recommended)
- Processor: Intel Core i3 or equivalent
- Memory (RAM): 4 GB minimum; 8 GB recommended
- Storage: 500 MB free disk space for application; additional space for company databases and backups
- Display: 1280 × 720 minimum resolution
- Printer: Optional — for invoices, reports, and barcode labels
- Internet: Optional — for WhatsApp/SMS bill sharing features

2.2 Installation Steps

- Obtain the BIZORA installer or application package from your authorized distributor.
- Run the installer and follow the on-screen prompts.
- Choose an installation directory (default is recommended).
- Allow the installer to create desktop and Start Menu shortcuts.
- Launch BIZORA from the desktop shortcut or Start Menu.
- On first launch, the Company Gateway screen appears — proceed to Chapter 3.

2.3 First Launch Checklist

- Create your first company (File → Create New Company) or open an existing one
- Set up the default Admin user password
- Configure invoice numbering prefixes (Settings → Invoice Settings)
- Enter opening balances for ledgers and stock (Entry → Opening Balance)
- Create party masters (Masters → Debtor/Creditor)
- Create product masters (Masters → Product/Service)
- Configure backup folder (Utilities → Backup and Restore Data)
- Set print defaults (Settings → Print Settings or Utilities → Print Settings)

5. Company Setup & Profile

5.1 Creating a New Company

Navigate to the Company Gateway → File → Create New Company. A wizard guides you through company creation. The system allows a maximum of **3 companies** per installation.

5.1.1 Company Information

Field	Description
Business Name *	Legal or trading name of the business. Required.
Financial Year *	Select the active financial year (e.g., 2025-26). Required.
Phone	Business contact phone number.
GSTIN	15-character GST Identification Number.
GST Registration Type	Regular or Composition.
Email	Business email address.

5.1.2 Business Details

Field	Description
Business Type	Retail, Wholesale, Service, Manufacturing, Trading, or Other.
Business Category	General, Electronics, Grocery, Textile, Medical, Restaurant, or Other.
Address	Full business address (multi-line).
State	Indian state (editable combo with state codes).
Pincode	Postal/ZIP code.

5.1.3 Uploads

Field	Description
Logo	Company logo for invoices. Formats: PNG, JPG, JPEG, PDF. Max 2 MB.
Signature	Authorized signatory image. Same formats and size limit as logo.

5.2 View Company (File → View Company)

Opens a read-only standalone window showing the complete company profile including Basic Information, Business Details, Address, print visibility toggles for invoice fields, logo/signature preview, and options to export or print the profile.

5.3 Close Company (File → Close Company)

Closes the active company session after confirmation, clears session data, and returns to the Dashboard. Use this before switching companies or logging out.

5.4 Financial Year Guard

All date fields in transaction entry screens are guarded by the Financial Year Guard. Dates outside the active company's financial year range will trigger a warning and are clamped to valid dates. This prevents accidental posting to wrong periods.

The 'Create New Company' wizard is a multi-step form with a light blue background. It is divided into three main sections: 'Company Information', 'Business Details', and 'Upload Details'. Each section contains various input fields and checkboxes. The 'Company Information' section includes fields for Business Name, Financial Year (set to 2026-27), Phone Number, GSTIN, GST Registration Type (set to Regular), and Email. The 'Business Details' section includes fields for Business Type, Business Category, Address, State, and Pincode. The 'Upload Details' section includes fields for Logo and Signature, each with a 'Print on Bill' checkbox. At the bottom right, there are 'Clear' and 'Create Company' buttons. The form is designed to be user-friendly with clear labels and a logical flow.

12. Settings & Configuration

12.1 General Settings

Field	Description
Theme	Dark (default) or Light with live preview.
Bold Fonts	Toggle bold text across the application.
Reset Layouts	Restore default window sizes and column widths.

12.2 Invoice Settings

Field	Description
Cash Tender	Show payment dialog after sales save.
Invoice Numbering	Prefix + entry type per voucher; 3-digit sequence.
Debug Mode	Enable console debug output.
Confirm Delete	Confirm before deleting transactions.

12.3 Print & Barcode Settings

Field	Description
Print Format	A4 or Thermal.
Print Theme	Classic or Modern Pink.
Header/Footer Text	Quotes, offers, terms and conditions.
Barcode	Label size, printer, offsets, live preview.

Note: Tax Settings opens Product Enter-navigation settings, not GST rate config.

Figure: Backup and Restore Data dialog

15.2 Compact and Repair

Runs PRAGMA integrity_check, REINDEX, and VACUUM. Reports database size before/after and space saved.

15.3 Close Financial Year

- Locks current financial year database
- Creates new company database with carried-forward balances
- Requires re-login to new financial year
- Application closes after completion

17. Read-Only Previous Financial Year Mode

When opening a previous financial year company, the application enters read-only mode. Window title shows: [READ ONLY - PREVIOUS FINANCIAL YEAR].

17.1 Allowed in Read-Only Mode

- View Company, Close Company
- All Books: Day Book, Cash Book, Ledger, Sales/Purchase Books, etc.
- All Reports: Trial Balance, P&L, Balance Sheet, GST reports
- Stock Report, Price List, Bill History

17.2 Blocked in Read-Only Mode

- All Entry screens (Sales, Purchase, Vouchers, etc.)
- Master data creation/editing
- Settings changes, Backup restore, Year-end

21. Appendix — Permission Matrix

The following table maps each menu route to required user permission tokens:

Module Group	Required Permission
Sales, Sales Return, Van Entry, Van Return	sales
Purchase, Purchase Return, Purchase Order	purchases
Quotation	quotations
Cash Payment, Bank Payment, PDC, Journal	payments
Cash Receipt, Bank Receipt	receipts
Credit/Debit Note	sales + purchases
All Books (Day Book, Ledger, Sales Book, etc.)	reports
All Reports (Trial Balance, P&L, Balance Sheet)	reports
GST Reports, GSTR-1	reports
Opening Balance, Stock Adjustment	settings
All Settings screens	settings
Backup, Year-End, Compact, Audit Logs	settings
Barcode, Stock Checker, System Diagnostics	settings
File → View Company, Close Company	No permission required
Masters (Account, Party, Bank, Product)	No permission required

Note: Admin role bypasses all permission checks. Users with ALL permission string also have unrestricted access.

22. Appendix — Read-Only Mode Allowed Routes

When viewing a previous financial year, these routes remain accessible:

Route	Route
Audit Logs	Balance Sheet
Route	Route
Barcode	Best Sellers (Top Products)
Route	Route
Bill History	Cash Book
Route	Route
Cash Tender History	Close Company
Route	Route
Daily Collection Report	Daily Stock Register
Route	Route
Day Book	GST Purchase Report
Route	Route
GST Sales Report	GSTR-1
Route	Route
Journal Book	Ledger
Route	Route
Ledger Statement	Monthly Analysis
Route	Route
PDC Book	Price List
Route	Route
Print Settings	Profit and Loss Account
Route	Route
Purchase Book	Purchase Order Book

Route	Route
Sales Book	Sales Return Book
Route	Route
Sales Wise Profit	Salesman Record Book

Route	Route
Stock Checker	Stock Report
Route	Route
Stock Value	System Diagnostics
Route	Route
Trial Balance	View Company

Year-End & Maintenance Workflows

Month-End Reporting

- Run Trial Balance, P&L, and Balance Sheet for the month
- Export GST Sales/Purchase reports and GSTR-1
- Run manual backup before month close

Year-End Closing

- Complete all pending entries for the financial year
- Run manual backup
- Utilities → Close Financial Year (Year-End)
- Re-login to the new financial year database

Note: Year-end locks the current database. Previous year opens in read-only mode.

18. Troubleshooting & Glossary

18.1 Common Issues

Field	Description
Application Not Responding	Heavy data loading — wait for processEvents. Reduce date range in reports.
Cannot Save Transaction	Check financial year date guard. Verify required fields. Check user permissions.
Stock Limit Exceeded	Product stock insufficient. Adjust stock or disable limit check.
Login Failed	Verify username/password. Contact Admin for password reset.
Backup Failed	Check backup folder path exists and is writable.
Print Not Working	Verify printer in Print Settings. Check default format (A4/Thermal).

18.2 Glossary

Field	Description
Debtor	Customer who owes money to your business (Accounts Receivable).
Creditor	Supplier to whom your business owes money (Accounts Payable).
B2B	Business-to-Business sale (registered GST customer).
B2CS	Business-to-Consumer Small (unregistered, below threshold).
B2CL	Business-to-Consumer Large (unregistered, above threshold).
CGST	Central Goods and Services Tax (intra-state).
SGST	State Goods and Services Tax (intra-state).
IGST	Integrated GST (inter-state).
HSN	Harmonized System of Nomenclature — product classification code.
GSTIN	GST Identification Number (15 characters).
FY	Financial Year (April to March in India).
PDC	Post-Dated Cheque — cheque with future date.
ITC	Input Tax Credit — GST paid on purchases.
MRP	Maximum Retail Price.
PO	Purchase Order.
WAL	Write-Ahead Logging — SQLite journal mode for performance.
