1. Introduction

BIZORA is a modern desktop accounting application developed by BIZORA Software Solutions. A modern desktop accounting application. It is designed for Indian businesses including retail, wholesale, trading, manufacturing, and service sectors. The application provides complete GST-compliant accounting with multi-company support, inventory management, financial reporting, and role-based user access.

1.1 Key Features

- Multi-company support (up to 3 companies per installation)
- Indian GST compliance — CGST, SGST, IGST, CESS, GSTR-1
- Sales, Purchase, Returns, Quotations, Purchase Orders
- Cash, Bank, Journal, and Post-Dated Cheque vouchers
- Van sales workflow for mobile distribution
- Complete chart of accounts and party masters
- Product/Service master with barcode support
- Books and registers for day-to-day operations
- Financial statements — Trial Balance, P&L, Balance Sheet
- Barcode label printing and stock checker utility
- Automatic backup and financial year-end processing
- Dark and Light themes with layout memory
- Keyboard-driven data entry for high-speed operation
- Role-based users with granular module permissions

1.2 Technology & Defaults

Field	Description
Application Name	BIZORA
Version	1.0.0
Platform	Windows 10/11 Desktop (PySide6 / Qt)
Database	SQLite (default); MySQL-ready architecture
Currency	Indian Rupee (₹) with 2 decimal places
Date Format	dd-MM-yyyy (e.g., 27-06-2026)
Default Window Size	1200 × 800 pixels (minimum 800 × 600)
Default Font	Segoe UI, size 10
Default Theme	Dark Theme

1.3 Who Should Use This Manual

This manual is intended for business owners, accountants, data entry operators, and system administrators who use BIZORA for daily accounting operations. Administrators should pay special attention to Chapters 15 (Users & Permissions), 16 (Utilities), and 17 (Backup & Maintenance).

2. System Requirements & Installation

2.1 Minimum System Requirements

- Operating System: Windows 10 or Windows 11 (64-bit recommended)
- Processor: Intel Core i3 or equivalent
- Memory (RAM): 4 GB minimum; 8 GB recommended
- Storage: 500 MB free disk space for application; additional space for company databases and backups
- Display: 1280 × 720 minimum resolution
- Printer: Optional — for invoices, reports, and barcode labels
- Internet: Optional — for WhatsApp/SMS bill sharing features

2.2 Installation Steps

- Obtain the BIZORA installer or application package from your authorized distributor.
- Run the installer and follow the on-screen prompts.
- Choose an installation directory (default is recommended).
- Allow the installer to create desktop and Start Menu shortcuts.
- Launch BIZORA from the desktop shortcut or Start Menu.
- On first launch, the Company Gateway screen appears — proceed to Chapter 3.

2.3 First Launch Checklist

- Create your first company (File → Create New Company) or open an existing one
- Set up the default Admin user password
- Configure invoice numbering prefixes (Settings → Invoice Settings)
- Enter opening balances for ledgers and stock (Entry → Opening Balance)
- Create party masters (Masters → Debtor/Creditor)
- Create product masters (Masters → Product/Service)
- Configure backup folder (Utilities → Backup and Restore Data)
- Set print defaults (Settings → Print Settings or Utilities → Print Settings)

3. Company Gateway & Login

When you start BIZORA, the **Company Gateway** appears as a full-screen floating window. This is your entry point for selecting a company, logging in, and setting your working date before entering the main workspace.

3.1 Gateway File Menu

Field	Description
Open Companies	Browse and select an existing company database to work with.
Create New Company	Launch the new company wizard. Maximum 3 companies per installation.

3.2 Login Card Fields

Field	Description
Company Label	Displays the selected business name, GSTIN, and state (read-only summary).
Username	Dropdown list of users registered in the selected company database.
Password	Required. Verified against stored password hash. Press Enter to log in.
Date	Working/login date with calendar popup. All transactions use this as the default date.
Login Button	Authenticates credentials and opens the main workspace with a loading screen.
Exit Button	Closes the application entirely.

3.3 Login Keyboard Shortcuts

- Username field → Enter: moves focus to Password field
- Password field → Enter: triggers Login
- Escape: closes the login dialog (where applicable)

3.4 Session Information Stored at Login

- Active username and role (User or Admin)
- Module permissions (comma-separated list or ALL for Admin)
- Working date for the session
- Active company database connection

Note: If you open a previous financial year company in read-only mode, the window title will show [READ ONLY - PREVIOUS FINANCIAL YEAR]. See Chapter 18 for details.

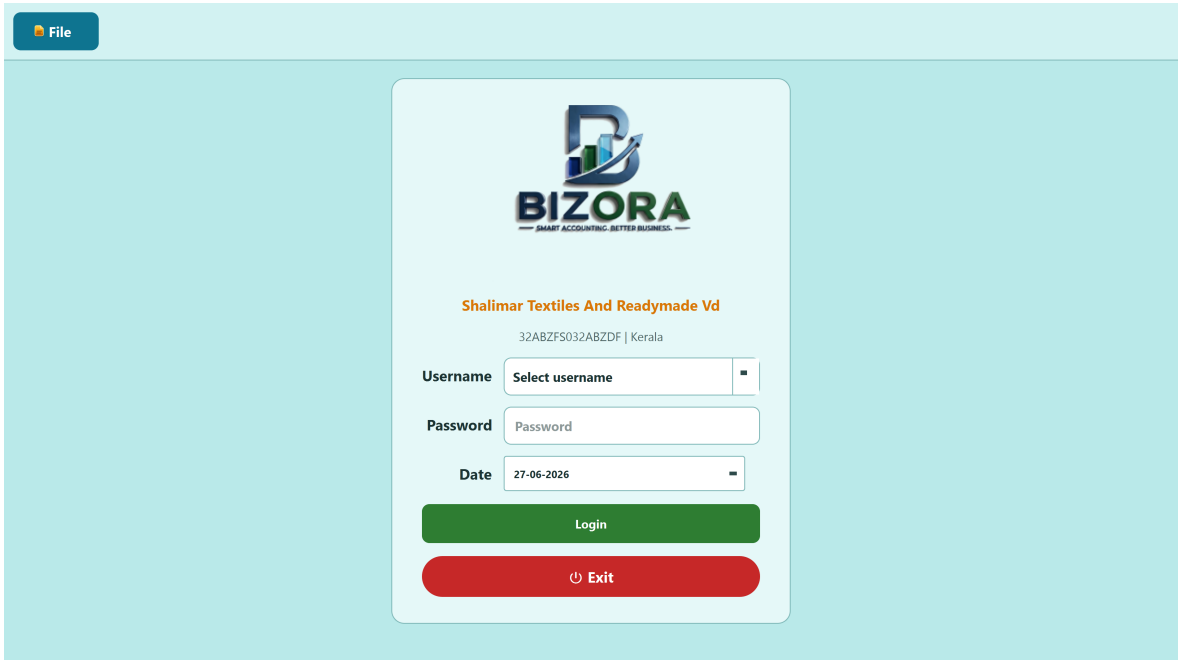

Figure: Company Gateway login screen

4. Main Window Tour

After successful login, BIZORA displays the main workspace. The default view is the **Dashboard**, which provides a financial overview. The workspace consists of four primary areas: Topbar, Shortcut Toolbar, Sidebar, and Central Content Area.

4.1 Topbar

Field	Description
Company Name	Shows the active company business name.
Date & Time	Current system date and time display.
User Role	Displays logged-in username and role (User/Admin).
Calculator	Opens an on-screen calculator dialog for quick calculations.
Log Out	Ends the session and returns to the Company Gateway.

4.2 Shortcut Toolbar

The shortcut toolbar provides one-click access to frequently used modules with icon buttons. It also includes a **Global Search** field (Ctrl+F) that finds menu routes and settings subsections across the entire application.

- Sales (Ctrl+L), Sales Return (Ctrl+R), Purchase (Ctrl+B)
- Cash Receipt (Ctrl+T), Cash Payment (Ctrl+M)
- Day Book (F6), Cash Book (F7), Ledger (F5)
- Stock Report (F9), Price List (F8)
- Global Search — type any module or setting name and press Enter

4.3 Sidebar Navigation

The left sidebar uses an accordion-style menu with nine sections. Click a section header to expand or collapse it. Click any menu item to open the corresponding module. Many entry screens open in standalone resizable windows.

- File — View Company, Close Company
- Masters — Account, Debtor/Creditor, Bank Account, Product/Service
- Entry — All transaction entry screens (Sales, Purchase, Vouchers, etc.)
- Books — Registers and operational books
- Reports — Financial and operational reports
- Utilities — Barcode, Stock Checker, Backup, Year-End, etc.
- Windows — Cascade (listed; not currently implemented)
- Settings — General, Tax, Invoice, User, Barcode, Print Settings
- About Me — Listed; use File → View Company for company profile

4.4 Dashboard (Home Screen)

The Dashboard is the default home screen showing key business metrics and charts.

Field	Description
Net Realized Sale	Total net sales realized for the current period.
Total to Give to Creditors	Outstanding amounts payable to suppliers/creditors.
Total to Get from Debtors	Outstanding amounts receivable from customers/debtors.
Day Credit Sale	Credit sales recorded for the current working day.
Monthly Sales Chart	Bar chart showing month-wise sales trend.
Monthly Purchases Chart	Bar chart showing month-wise purchase trend.
Recent Activity	Last 5 transactions; auto-refreshes every 15 seconds.

4.5 Standalone Module Windows

Many modules (Sales Entry, Purchase Entry, Masters, etc.) open in separate resizable windows rather than replacing the Dashboard. Window sizes and positions are remembered by the UI Memory system (see Chapter 19). You can have multiple module windows open simultaneously.

Figure: Dashboard home screen with metrics and charts

5. Company Setup & Profile

5.1 Creating a New Company

Navigate to the Company Gateway → File → Create New Company. A wizard guides you through company creation. The system allows a maximum of **3 companies** per installation.

5.1.1 Company Information

Field	Description
Business Name *	Legal or trading name of the business. Required.
Financial Year *	Select the active financial year (e.g., 2025-26). Required.
Phone	Business contact phone number.
GSTIN	15-character GST Identification Number.
GST Registration Type	Regular or Composition.
Email	Business email address.

5.1.2 Business Details

Field	Description
Business Type	Retail, Wholesale, Service, Manufacturing, Trading, or Other.
Business Category	General, Electronics, Grocery, Textile, Medical, Restaurant, or Other.
Address	Full business address (multi-line).
State	Indian state (editable combo with state codes).
Pincode	Postal/ZIP code.

5.1.3 Uploads

Field	Description
Logo	Company logo for invoices. Formats: PNG, JPG, JPEG, PDF. Max 2 MB.
Signature	Authorized signatory image. Same formats and size limit as logo.

5.2 View Company (File → View Company)

Opens a read-only standalone window showing the complete company profile including Basic Information, Business Details, Address, print visibility toggles for invoice fields, logo/signature preview, and options to export or print the profile.

5.3 Close Company (File → Close Company)

Closes the active company session after confirmation, clears session data, and returns to the Dashboard. Use this before switching companies or logging out.

5.4 Financial Year Guard

All date fields in transaction entry screens are guarded by the Financial Year Guard. Dates outside the active company's financial year range will trigger a warning and are clamped to valid dates. This prevents accidental posting to wrong periods.

6. Keyboard Navigation Reference

BIZORA is designed for high-speed keyboard-driven data entry. The Enter and Escape keys provide forward and backward navigation through fields. Global shortcuts open modules instantly from anywhere in the application.

6.1 Global Action Shortcuts

Shortcut	Action
Ctrl+S	Save — saves the current record/voucher in context modules
Ctrl+P	Print — prints the current document
Ctrl+F	Global Search — search all menu routes and settings
Ctrl+N	New Record — create a new entry in context modules

6.2 Module Navigation Shortcuts

Shortcut	Action
Ctrl+L	Sales Entry
Ctrl+R	Sales Return
Ctrl+B	Purchase Entry
Ctrl+U	Purchase Return
Ctrl+Q	Quotation Entry
Ctrl+K	Purchase Order
Ctrl+T	Cash Receipt
Ctrl+M	Cash Payment
Ctrl+I	Bank Receipt
Ctrl+Y	Bank Payment
Ctrl+J	Journal Entry
Ctrl+D	Post Dated Cheque
Ctrl+H	Credit/Debit Note
Ctrl+W	Van Entry
Ctrl+E	Van Return Entry
F5	Ledger
F6	Day Book
F7	Cash Book
F8	Price List

Shortcut	Action
F9	Stock Report

6.3 Enter / Escape Navigation Rules

Universal Rule: Enter moves forward to the next field. Escape moves backward to the previous field. This applies consistently across all data entry screens.

6.3.1 Sales / Purchase / Return Billing Grid

- **Local GST Enter flow:** Product → HSN → CGST → SGST → CESS → Rate → Qty → Gross → Disc
- **Inter-state Enter flow:** Product → HSN → IGST → CESS → Rate → Qty → Gross → Disc
- **Escape:** Reverse of the above column sequence
- After the last column (Disc): a new row is created; focus moves to Barcode (if enabled) or Product
- **Down Arrow in Disc column:** Converts the discount value to a percentage of gross amount
- **Qty Enter:** May block entry if stock limit is exceeded (configurable behaviour)
- **Single mouse click** on an editable cell: activates edit mode and selects all text for immediate overwrite

6.3.2 Cash / Bank Vouchers

- Enter/Escape on grid cell widgets moves forward/backward through cells
- Tab navigation between header fields follows standard form order

6.3.3 Opening Balance Grids

- Enter → next column; Escape → previous column or previous row
- Account selection auto-suggests Dr/Cr based on account type

6.3.4 Product Master

- Enter-key jump order is configurable in Settings → Tax Settings (Product Settings)
- Default order follows the visual field layout on the Product Entry form

6.3.5 Credit / Debit Note

- Sequential Enter/Escape across all header fields: Note No → Date → Type → Party → Reason → etc.

7. Masters Module

Master data forms the foundation of all accounting transactions. Set up masters before entering transactions. Access all masters from the sidebar **Masters** section.

7.1 Account (Chart of Accounts)

Path: Masters → Account. Three tabs: Create Account, Account Groups, Account List.

7.1.1 Account Types

- Party (Debtor/Creditor)
- Cash/Bank Account
- Income Account
- Expense Account
- Tax Liability (GST)
- Capital Account
- Stock Account

7.1.2 Create Account Fields

Field	Description
Account Name *	Unique name for the ledger account. Required.
Account Type *	Select from the types listed above. Required.
Group	Searchable account group (e.g., Salary, Rent, Direct Expenses).
Opening Balance	Numeric opening balance amount.
Dr/Cr	Debit or Credit indicator for the opening balance.
Account Code	Optional short code for quick reference.

7.1.3 Account Groups

Create custom groups via the Account Groups tab. Group Name examples: Salary, Rent, Direct Expenses, Indirect Expenses.

7.1.4 Edit Account

Field	Description
Name	Modify account name.
Type	Change account type.
Group	Reassign to a different group.
Opening Balance	Update opening balance.
Balance Type	Dr or Cr.
Code	Update account code.

7.2 Debtor / Creditor (Party Master)

Path: Masters → Debtor/Creditor. Two pages: Party Entry and Party List.

Field	Description
Party Name *	Full name of the customer/supplier. Required.
Code	Short party code, max 7 characters. Auto-suggested on entry.
Party Type *	Debtor (customer), Creditor (supplier), or Both. Required.
Opening Balance	Outstanding balance at start of financial year.
Mobile Number	Contact mobile for SMS/WhatsApp bill sharing.
Email	Contact email address.
Credit Limit	Maximum credit allowed for this party.
GSTIN	15-character GST Identification Number.
State	Indian state (editable combo with all states).
Contact Person	Name of primary contact (auto title-cased).
Address	Full postal address.
Notes	Free-text notes about the party.

Party List supports filtering, search, and export to PDF, Word, or Excel.

7.3 Bank Account Master

Field	Description
Account Name *	Display name for this bank account. Required.
Bank Name *	Name of the bank institution. Required.
Account Number *	Bank account number. Required.
IFSC Code	Indian Financial System Code.
Branch Name	Bank branch location.
Opening Balance	Balance at start of financial year.
Notes	Additional notes.

7.4 Product / Service Master

Path: Masters → Product/Service. Pages: Product Entry, Product List, Settings (gear).

Field	Description
Product Name *	Unique product or service name. Required.
Barcode	Product barcode with Auto-generate checkbox.

Field	Description
HSN	HSN code for GST.
Color / Size / Unit / Category	Product attributes.
Purchase Rate / Sale Price / Wholesale / MRP	Price with margin display.
CGST / SGST / IGST / CESS %	Tax rate percentages.
Reorder Level / Quantity	Stock management fields.
Description	Free-text description.

8. Transaction Entry

8.1 Sales Bill (Ctrl+L)

8.1.1 Header Fields

Field	Description
Invoice No	Auto-generated. ▲▼ navigate bills. Fixed mode for specific numbers.
Date / Type / Nature	Date, Cash/Credit, Local/Inter-state GST.
Form of Sale	B2B, B2CS, or B2CL.
Party / Due Date	Party filter and payment due date (+30 days default).

8.1.2 Party Matrix

Field	Description
Name / Address / Mobile / GSTIN / State	Name details with master lookup.
Narration / Salesman	Narration text and assigned salesman.

8.1.3 Product Strip & Grid

Barcode scan, Product search popup, Rate selector (Sales/Purchase/Wholesale/MRP).

Grid columns: SL, Product, HSN, CGST%, SGST%, IGST%, CESS%, Rate, Qty, Gross, Disc, Net, Tax, Total.

8.1.4 Footer & Actions

Field	Description
Balances	Opening Bal, Closing Bal, Grand Total, Amt Received, Balance.
Adjustments	Freight, Round Off, Discount (Down-arrow = %), Net Amount.
Tax Summary	Net Value, CGST, SGST, IGST, Tax Amount, Cess.
Actions	Save/Update, Print, WhatsApp, SMS, Reset All, Remove Item, Remove Bill, Export PDF.

Note: Cash Tender dialog appears after save if enabled in Invoice Settings.

Figure: Sales Bill entry screen

- Title: PURCHASE BILL; Purchase No instead of Invoice No
- Creditor-focused party matrix with Code field and Creditor button
- Import PO button to import from Purchase Order
- Grid includes Sales Rate column (15 columns total)
- Checkbox: Entry with Specific Purchase No.

Figure: Purchase Bill entry screen

Page 21

Same UI patterns as parent entry with return-specific columns and rate handling.

8.4 Quotation (Ctrl+Q)

Full quotation entry. Can convert to Sales Bill when accepted by customer.

8.5 Purchase Order (Ctrl+K)

PO entry screen. Importable into Purchase Bill via Import PO button.

8.6 Cash & Bank Vouchers

Cash Receipt (Ctrl+T), Cash Payment (Ctrl+M), Bank Receipt (Ctrl+I), Bank Payment (Ctrl+Y).

Field	Description
Tabs	General A/C Debtor A/C Creditor A/C Bill Receipt/Payment
Voucher No	Auto-numbered with ▲▼ navigation.
Date	Voucher date.
Cash/Bank Account	Searchable combo with current balance display.
Remark	Voucher narration.

8.7 Journal Entry (Ctrl+J)

Field	Description
Voucher No / Date / Remark	Header fields with ▲▼ navigation.
Lines Table	Account (searchable), Debit, Credit, Narration.

Field	Description
Actions	Add Line, Delete Line, Save, Navigate ▲▼.

8.8 Post Dated Cheque (Ctrl+D)

Tabs: Receipt | Issue. Fields: party, bank, cheque number, dates, amounts. Due-date alerts. View in PDC Book.

8.9 Credit / Debit Note (Ctrl+H)

Memo-only entry (no ledger/stock posting). Reason options:

- Deficit/Damage on goods purchased / sold
- Discount on purchases / sales
- Purchase/Sales price variation
- Purchase return / Sales return

8.10 Van Entry (Ctrl+W) & Van Return (Ctrl+E)

Mobile van stock load and return. Van Entry can convert to Sales Bill.

8.11 Opening Balance & Opening Stock

Entry → Opening Balance (same page for stock tab).

Field	Description
Ledger Tab	SL, Ledger, Dr/Cr, Amount, Narration
Stock Tab	SL, Barcode, Product, Qty, Rate, Value

8.12 Stock Adjustment

Stock quantity adjustments using billing-style product grid.

9. Books & Registers

Books provide read-only registers of all transactions. Most books support date filters, export, and double-click to open source voucher for editing.

9.1 Core Accounts

Field	Description
Day Book (F6)	All vouchers chronologically for a date range.
Cash Book (F7)	Cash account movements.
Ledger (F5)	Account-wise ledger with Type filter (General/Cash&Bank/Debtors/Creditors), date range, summary or
Ledger Statement	Party/account statement format.

9.2 Sales & Returns Books

Field	Description
Sales Book	All sales invoices. Double-click to edit.
Sales Return Book	Sales return register.
Bill History	Customer-wise bill history.
Cash Tender History	Cash tender payment records.
Sales Wise Profit	Profit analysis per sale.

9.3 Purchases & Returns Books

Field	Description
Purchase Book	All purchase bills. Double-click to edit.
Purchase Return Book	Purchase return register.
Purchase Order Book	Open and closed purchase orders.

9.4 Other Books

Field	Description
Quotation Book	All quotations.
Stock Report (F9)	Current stock levels.
Daily Stock Register	Day-wise stock movement.
Price List (F8)	Product rates.
GST Sales/Purchase Reports	GST compliance registers.

Field	Description
GSTR-1	GSTR-1 export.
Journal Book	Journal vouchers.
PDC Book	Post-dated cheques.
Monthly Analysis	Period analysis.

14. Utilities

Field	Description
Barcode	Print queue and label manager.
Stock Checker	Physical stock audit with barcode scan.
System Diagnostics	Health checks.
Audit Logs	Change audit trail.
Inter-Company Transfer	Move data between companies.
Close Financial Year	Lock FY and create new database.
Compact and Repair	VACUUM, REINDEX, integrity check.

15. Backup, Restore & Maintenance

15.1 Backup Settings

Field	Description
Backup Folder Path	Target directory for backup files.
Auto-Backup on Close	Automatic backup when application closes.
Run Manual Backup Now	Immediate backup of company database.
Restore from Backup	DANGER: Overwrites all data. Restore scheduled on restart.

Figure: Backup and Restore Data dialog

15.2 Compact and Repair

Runs PRAGMA integrity_check, REINDEX, and VACUUM. Reports database size before/after and space saved.

15.3 Close Financial Year

- Locks current financial year database
- Creates new company database with carried-forward balances
- Requires re-login to new financial year
- Application closes after completion

16. UI Features & Preferences

16.1 UI Memory

BIZORA remembers your layout preferences automatically:

- Main window geometry and splitter state
- Standalone module window sizes and positions
- QTableWidget column widths and order
- Reset via General Settings or Invoice Settings → Reset Layouts

16.2 Themes

- Dark Theme (default)
- Modern Light Theme
- Bold font toggle
- Live preview in settings

16.3 Global Search (Ctrl+F)

Search all menu routes and settings subsections: Theme, Font, Layout, Cash Tender, Invoice Numbering, etc.

16.4 Calculator

Topbar calculator button opens an on-screen calculator.

17. Read-Only Previous Financial Year Mode

When opening a previous financial year company, the application enters read-only mode. Window title shows: [READ ONLY - PREVIOUS FINANCIAL YEAR].

17.1 Allowed in Read-Only Mode

- View Company, Close Company
- All Books: Day Book, Cash Book, Ledger, Sales/Purchase Books, etc.
- All Reports: Trial Balance, P&L, Balance Sheet, GST reports
- Stock Report, Price List, Bill History

17.2 Blocked in Read-Only Mode

- All Entry screens (Sales, Purchase, Vouchers, etc.)
- Master data creation/editing
- Settings changes, Backup restore, Year-end

18. Troubleshooting & Glossary

18.1 Common Issues

Field	Description
Application Not Responding	Heavy data loading — wait for processEvents. Reduce date range in reports.
Cannot Save Transaction	Check financial year date guard. Verify required fields. Check user permissions.
Stock Limit Exceeded	Product stock insufficient. Adjust stock or disable limit check.
Login Failed	Verify username/password. Contact Admin for password reset.
Backup Failed	Check backup folder path exists and is writable.
Print Not Working	Verify printer in Print Settings. Check default format (A4/Thermal).

18.2 Glossary

Field	Description
Debtor	Customer who owes money to your business (Accounts Receivable).
Creditor	Supplier to whom your business owes money (Accounts Payable).
B2B	Business-to-Business sale (registered GST customer).
B2CS	Business-to-Consumer Small (unregistered, below threshold).
B2CL	Business-to-Consumer Large (unregistered, above threshold).
CGST	Central Goods and Services Tax (intra-state).
SGST	State Goods and Services Tax (intra-state).
IGST	Integrated GST (inter-state).
HSN	Harmonized System of Nomenclature — product classification code.
GSTIN	GST Identification Number (15 characters).
FY	Financial Year (April to March in India).
PDC	Post-Dated Cheque — cheque with future date.
ITC	Input Tax Credit — GST paid on purchases.
MRP	Maximum Retail Price.
PO	Purchase Order.
WAL	Write-Ahead Logging — SQLite journal mode for performance.

About Me	Click to open module

20. Step-by-Step Workflows

20.1 Daily Sales Entry Workflow

- 1. Press Ctrl+L or click Entry → Sales from sidebar
- 2. Verify Date and set Type (Cash/Credit) and Nature (Local/Inter-state)
- 3. Enter Party Name (type and press Enter to search, or use Debtors button)
- 4. Enable Barcode tick if scanning; scan barcode or type product name
- 5. Verify Rate, enter Qty — press Enter through grid columns
- 6. Add more line items; adjust Freight, Discount, Round Off if needed
- 7. Review Tax Summary and Grand Total
- 8. Press Ctrl+S or click Save/Update
- 9. Complete Cash Tender dialog if enabled
- 10. Press Ctrl+P to print invoice

20.2 New Company Setup Workflow

- 1. Company Gateway → File → Create New Company
- 2. Fill Business Name, Financial Year, GSTIN, State
- 3. Select Business Type and Category
- 4. Upload Logo and Signature (optional)
- 5. Click Create — default Admin user is created
- 6. Login with Admin credentials
- 7. Settings → Invoice Settings — configure prefixes
- 8. Masters → Account — verify default accounts
- 9. Masters → Debtor/Creditor — add parties
- 10. Masters → Product/Service — add products with HSN and tax rates
- 11. Entry → Opening Balance — enter ledger and stock opening balances
- 12. Utilities → Backup — set backup folder and enable auto-backup

20.3 Purchase with PO Import Workflow

- 1. Entry → Purchase Order — create PO with supplier and items
- 2. Save the Purchase Order
- 3. Entry → Purchase — open Purchase Bill
- 4. Select the Creditor (supplier)
- 5. Click Import PO — select the purchase order
- 6. Verify imported line items and rates
- 7. Save the Purchase Bill

20.4 Quotation to Sales Conversion

- 1. Entry → Quotation — create quotation with customer and items
- 2. Save quotation
- 3. When customer accepts, use Convert to Sales Bill option
- 4. Review and save as Sales Invoice

20.5 Van Sales Workflow

- 1. Entry → Van Entry — load stock onto van with products and quantities
- 2. Save van load entry
- 3. During route sales, convert Van Entry to Sales Bill
- 4. Entry → Van Return Entry — return unsold stock at end of day

20.6 Month-End Reporting Workflow

- 1. Books → Day Book — verify all vouchers for the month
- 2. Reports → Trial Balance — run for month date range
- 3. Reports → Profit and Loss Account — review income/expenses
- 4. Books → GST Sales Report and GST Purchase Report
- 5. Books → GSTR-1 — export for GST filing
- 6. Reports → Balance Sheet — verify assets/liabilities
- 7. Utilities → Backup — run manual backup before month close

20.7 Year-End Closing Workflow

- 1. Complete all pending entries for the financial year
- 2. Run Trial Balance and verify balances
- 3. Run manual backup (Utilities → Backup and Restore Data)
- 4. Utilities → Close Financial Year (Year-End)
- 5. Confirm year-end process — current DB is locked
- 6. New FY database is created with carried-forward balances
- 7. Re-login to the new financial year company

21. Appendix — Permission Matrix

The following table maps each menu route to required user permission tokens:

Module Group	Required Permission
Sales, Sales Return, Van Entry, Van Return	sales
Purchase, Purchase Return, Purchase Order	purchases
Quotation	quotations
Cash Payment, Bank Payment, PDC, Journal	payments
Cash Receipt, Bank Receipt	receipts
Credit/Debit Note	sales + purchases
All Books (Day Book, Ledger, Sales Book, etc.)	reports
All Reports (Trial Balance, P&L, Balance Sheet)	reports
GST Reports, GSTR-1	reports
Opening Balance, Stock Adjustment	settings
All Settings screens	settings
Backup, Year-End, Compact, Audit Logs	settings
Barcode, Stock Checker, System Diagnostics	settings
File → View Company, Close Company	No permission required
Masters (Account, Party, Bank, Product)	No permission required

Note: Admin role bypasses all permission checks. Users with ALL permission string also have unrestricted access.

22. Appendix — Read-Only Mode Allowed Routes

When viewing a previous financial year, these routes remain accessible:

Route	Route
Audit Logs	Balance Sheet
Route	Route
Barcode	Best Sellers (Top Products)
Route	Route
